Product Information

Overview

Originally released March 2016

Unlocked, SIM-Free, Model A1662[1]

4-inch Retina display with IPS technology

A9 chip with embedded M9 motion coprocessor

Talk time up to 14 hours

LTE and 802.11ac Wi-Fi

Bluetooth 4.2 wireless technology

NFC

12-megapixel camera

Digital zoom up to 5x

1080p HD video recording

Touch ID

Siri

Apple Pay

3.99 ounces and 0.30 inch

What's in the Box

iPhone SE

EarPods with 3.5 mm Headphone Plug

Lightning to USB Cable

USB Power Adapter

Documentation

System Requirements

Apple ID (required for some features)

Internet access[2]

Syncing with iTunes on a Mac or PC requires:

Mac: OS X v10.9.5 or later

PC: Windows 7 or later

iTunes 12.5 or later (free download from www.itunes.com/download)

Environmental Requirements

Operating ambient temperature: 32° to 95° F (0° to 35° C), Non-operating temperature: -4° to 113° F (-20° to 45° C), Relative humidity: 5% to 95% noncondensing, and Operating altitude: Tested up to 10,000 feet (3000 m).

iPhone SE is designed with the following features to reduce environmental impact:

Arsenic-free display glass

Mercury-free LED-backlit display

Brominated flame retardant–free

PVC-free

Beryllium-free

Recyclable aluminum enclosure

Features

Design. A beloved design. Now with more to love.

iPhone SE takes an incredibly popular design and refines it even further. Crafted from bead-blasted aluminum for a satin-like finish, this light and compact phone is designed to fit comfortably in your hand. A brilliant 4-inch[3] Retina display makes everything look vibrant and sharp. And matte-chamfered edges and a color-matched stainless steel logo finish the look.

Technology. The most powerful 4-inch phone ever.

At the core of iPhone SE is the A9, the same advanced chip that's in iPhone 6s. With 64-bit desktop-class architecture, the A9 chip brings you spectacular speed and responsiveness. And with console-class graphics performance, your favorite games and apps are incredibly rich and immersive. Making it a mighty chip for maximum performance.

A9 Chip. Super-efficient M9 motion coprocessor.

Embedded directly into the A9 chip, the M9 motion coprocessor connects to the accelerometer, compass, and gyroscope for a range of fitness tracking capabilities, such as measuring your steps and distance. It also makes it easy to activate Siri by simply saying "Hey Siri," without having to pick up your iPhone.

Camera. The only camera you'll ever need.

With a 12-megapixel camera, you can be sure to capture sharp, detailed stills like the ones shot on iPhone 6s. That includes shooting — and even editing — brilliant 4K video, which is up to four times the resolution of 1080p HD video.

Live Photos. Capture more than a moment.

Live Photos bring your still photos to life with sound and movement. Simply touch and hold anywhere on your 12-megapixel still and experience the moments just before and after it was taken, so your photos turn into living memories.

FaceTime HD camera with Retina Flash. Your selfie just got more beautiful.

The Retina display isn't just a place to see your content — it's a flash for your FaceTime HD camera. Powered by a custom display chip that allows the display to flash three times brighter than usual, the Retina Flash helps illuminate your selfies in low light and at night. And a True Tone flash matches the ambient light for more true-to-life colors and natural-looking skin tones.

iCloud Photo Library. All your photos and videos, always with you.

iCloud Photo Library stores every photo and video you take and keeps them up to date on all your devices. Any edits you make are automatically updated everywhere, so you can view a photo from last week or last year no matter where you are.

Touch ID. Advanced security. Right at your fingertip.

Touch ID makes unlocking your iPhone SE simple and secure. After all, your fingerprint is the perfect password — no two are alike, and you always have it with you.

Apple Pay. An easier, more secure way to pay.

Touch ID isn't just for unlocking your phone. It also lets you use Apple Pay at over two million stores and within apps. In stores, just hold your iPhone near the reader with your finger on Touch ID and you're done. Because your card details are never shared — or even stored on your device — Apple Pay is a safer, more private way to pay.

Wireless. Faster LTE and Wi-Fi.

Browse the web, download apps and games, and stream video over 802.11ac Wi-Fi and LTE. And more LTE bands make iPhone SE better for worldwide roaming. iPhone SE also supports Voice over LTE and Wi-Fi calling for high-quality wideband calls.[4] And with Bluetooth technology, you can stay connected to your Apple Watch, external speakers, and other devices.

iOS. It's why there's nothing else like an iPhone.

With an easy-to-use interface, amazing features, and security at its core, iOS is the most advanced mobile operating system and the foundation of iPhone SE. It's designed to look beautiful and work beautifully on your iPhone, so even the simplest tasks are more fun.

Apps that help you do more every day.

Your iPhone comes with a collection of essential apps right out of the box. Messages lets you send texts with photos, videos, links, and more. Music makes it easy to access the entire Apple Music library along with your personal collection.[5] With FaceTime you can make video calls from your iPhone to someone else's iPhone, iPad, or Mac. And Maps keeps you headed in the right direction with spoken turn-by-turn navigation, real-time traffic updates, and a helpful Transit view.

Siri. Your wish is its command.

Siri is your personal assistant, letting you use your voice to send messages, search the web, get guidance on public transportation, and more. You can even ask Siri to search your photo library to find just the photo or video you're looking for.

Tech Specs

Capacity

32GB

128GB[6]

Processor

A9 chip with 64-bit architecture

Embedded M9 motion coprocessor

Display

Retina display

4-inch (diagonal) widescreen LCD Multi-Touch display with IPS technology

1136-by-640-pixel resolution at 326 ppi

800:1 contrast ratio (typical)

Full sRGB standard

500 cd/m2 max brightness (typical)

Fingerprint-resistant oleophobic coating

Support for display of multiple languages and characters simultaneously

Power and Battery

Built-in rechargeable lithium-ion battery

Charging via USB to computer system or power adapter

Talk time (wireless): Up to 14 hours on 3G[7]

Internet use: Up to 12 hours on 3G, Up to 13 hours on LTE, Up to 13 hours on Wi-Fi[7]

$159.00

---

1. To identify your iPhone model number, see http://support.apple.com/kb/HT3939. For details on LTE support, contact your carrier and see www.apple.com/iphone/LTE. Cellular technology support is based on iPhone model number and configuration for either CDMA or GSM networks.
2. Wireless broadband recommended; fees may apply.
3. Display size is measured diagonally.
4. Data plan required. LTE, VoLTE, and Wi-Fi calling are available in select markets and through select carriers. Speeds are based on theoretical throughput and vary based on site conditions and carrier. For details on LTE support, contact your carrier and see www.apple.com/iphone/LTE.
5. Subscription is required for Apple Music.
6. Available space is less and varies due to many factors. A standard configuration uses approximately 8GB to 11GB of space (including iOS and preinstalled apps) depending on the model and settings. Preinstalled apps use about 4GB, and you can delete these apps and restore them.
7. All battery claims depend on network configuration and many other factors; actual results will vary. Battery has limited recharge cycles and may eventually need to be replaced by Apple service provider. Battery life and charge cycles vary by use and settings. See www.apple.com/batteries and www.apple.com/iphone/battery.html for more information.
8. FaceTime calling requires a FaceTime-enabled device for the caller and recipient and a Wi-Fi connection. Availability over a cellular network depends on carrier policies; data charges may apply.
9. Siri may not be available in all languages or in all areas, and features may vary by area. Internet access required. Cellular data charges may apply.
10. Size and weight vary by configuration and manufacturing process.

†† We approximate your location from your Internet IP address by matching it to a geographic region or from the location entered during your previous visit to Apple.
